# THE HEART OF A NEW ECONOMY

## TOTNES ATMOS

Come along to hear all about this  
ground-breaking campaign to bring the former Dairy  
Crest site into community ownership!

**Atmos: the project**  
**Tuesday 17th April, 2012**  
**8pm, Totnes Civic Hall**

The Atmos Project, co-ordinated by Totnes Development Trust and Transition Town Totnes, has spent the past 5 years working on community plans for the former Dairy Crest site. It proposes an ambitious scheme which would see the site developed as **the heart of a new economy**, a mixture of spaces for new businesses, affordable housing and public space. It was launched 2 weeks ago when over 300 people joined Jonathan Dimbleby for a public show of support.

Join us to hear more about the campaign, the proposals, how Atmos Totnes is localism in practice, to share your hopes and visions for the site, and to be a part of making history for our town. With so much development proposed in Totnes, this is the last site that can still be developed for, with and by the community of Totnes. **Let's make this happen.**
